

1+MG / B1MG Stakeholder Forum

Wrap up

13 October 2022

Ruben Kok, Serena Scollen

slido

If you are associated with a project, please could you let us know which one?

① Start presenting to display the poll results on this slide.

Which stakeholder group do you most associate yourself with?

Academia

35%

Healthcare

21%

Policy/Government

21%

Industry

13%

Other

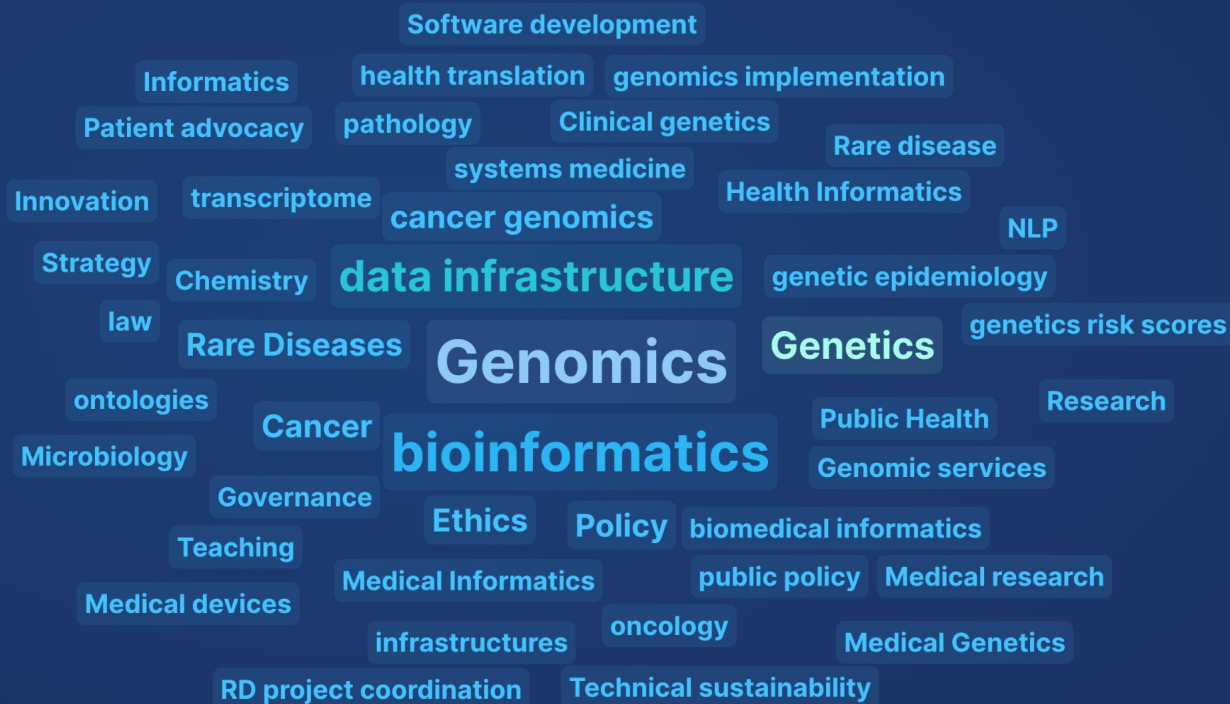

10%

Citizens

1%

What is your field of expertise? (you may submit multiple answers)

Which country do you represent?

B1MG

Which project/initiative/company are you associated with?

**We will produce a report -
and see our B1MG newsletters!**

Implementation and next steps

- 1+MG Trust Framework
- Genomic Data Infrastructure
- Alignment with EHDS
 - E.g. through TEHDAS, EHDS pilot,
- Engagement with other initiatives and projects
 - E.g. GAIA-X, EOSC, ESFRI's, GA4GH
 - Field specific initiatives such as EJP-RD, Solve-RD in RD field

Industry engagement

- There are strong **examples of public-private partnerships** so there is good evidence that collaboration with the industry is very well possible.
- It is **important to understand incentive(s) and motivation(s)** for the industry (e.g. industry as data user or as mean to ensure data quality).
- Different sectors of the industry should all be involved but depending on the question, a **breakdown (pharma, bio, IT...)** might be useful for fostering engagement.
- There is still **fear of involving industry**: Industry has a different purpose (commercialisation), culture, traditions, priorities - a collaboration is possible if these aspects are acknowledged.
- A **continuous exchange with industry sectors** is needed to develop a “comfort-zone”, to de-mystify industry engagement, and build trust.
 - **Establish an Industry Forum!**

General Recommendations in scaling up and making 1+MG sustainable

- Engage citizens and patients more actively
- Engage doctors (and address their side of the work)
 - Compliance by design: make IT systems in clinical setting more easy to be used by clinicians to comply to standards and ELSI regulations in making data accessible in the framework of 1+MG/EHDS
- Build capacity in countries to implement national infrastructures that implement the 1+MG Trust Framework
 - and e.g. implement (FAIR) standards in clinical and research setting

Use case summary...

We have a dream ...

We will have a European Genome Centre

Huge thank you to...

ALL OUR SPEAKERS AND CHAIRS

EVERYONE WHO HAS JOINED AND PARTICIPATED!!!

Please continue to participate...

Slido will remain open until CoB Monday 17th October for your input to questions in the 'ideas' section

Go to www.slido.com from your phone or computer and enter the code below OR scan the QR Code to start participating in today's meeting polls or to pose questions.

SF2022

Huge thank you to organisers ...

Anamika Chatterjee (ELIXIR)

Nikki Coutts (ELIXIR)

Support from the broader team at the ELIXIR Hub to run this meeting effectively

B1MG WP1 members

Become a 1+MG/ B1MG Stakeholder!

If you haven't registered yet to become an official stakeholder of the B1MG project, don't forget to sign up to gain access to the portal and the group discussions <https://bit.ly/b1mg-stakeholder>

If you want to keep up to date with all the B1MG developments, don't forget to subscribe to our quarterly newsletter <https://mailchi.mp/elixir-europe.org/become-part-of-the-b1mg-community>

Or follow us on Twitter https://twitter.com/B1MG_Project and LinkedIn <https://www.linkedin.com/company/b1mg-project/>

+ B1MG has received funding from the European Union's Horizon 2020 Research and Innovation programme under grant agreement No 951724

Thank you!
